PROFILE

Full-stack developer with hands-on production experience building enterprise web applications in Angular and .NET/C#. Comfortable across the stack: REST API design, SQL Server data modelling, and responsive front-end interfaces. Background also includes independent game development, local and cloud AI model hosting, and a self-hosted multiplayer game server. Advanced user of AI-assisted development tools (Claude Code — skills, connectors, MCPs — and Codex) as part of a daily engineering workflow. Looking to bring that same full-stack ownership to a team in the EU.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3

Backend: .NET, ASP.NET Core, C#, REST API design

Databases: SQL Server, MySQL

Tools & Practices: Git, Visual Studio, VS Code, code review, debugging & performance optimisation

Other: Unity, Unreal Engine, GameMaker, Linux server administration (Nginx, Cloudflare)

AI-Assisted Development: Advanced user of Claude Code (skills, connectors, MCPs) and OpenAI Codex — agentic coding workflows

AI Infrastructure: Local & cloud AI model hosting/serving

EXPERIENCE

Full-Stack Developer — Poulina Group Holding *Nov 2024 – Present*

- Build and maintain enterprise web applications using Angular and .NET.
- Design and implement REST APIs and business logic for internal systems.
- Develop responsive, performant, and user-friendly interfaces.
- Manage SQL Server databases and integrate with existing enterprise systems.
- Diagnose and resolve production issues; optimise application performance.
- Collaborate with business and technical stakeholders; participate in code reviews.

INDEPENDENT PROJECTS

Local & Cloud AI Model Hosting

- Experience self-hosting and serving AI models both locally and in the cloud, including remote access setups via tunnelling.

Game Projects & FiveM Server

- Built several small games (2D/3D) as personal projects, and contributed to the development of a FiveM multiplayer game server.

EDUCATION

Holberton School

Software Engineering Diploma — intensive two-year software engineering program

LANGUAGES

Arabic (native) • French (conversational) • English (professional)
